

## ADMINISTRATIVE NOTES

U.S. GOVERNMENT PRINTING OFFICE  
SUPERINTENDENT OF DOCUMENTS  
LIBRARY PROGRAMS SERVICE

VOL. 5, NO. 14

GP 3.16/3-2:5/14

NOVEMBER 1984

### GPO AT MID-WINTER ALA

If you happen to be in Washington, D.C., for the Mid-Winter Meeting of the American Library Association, do stop by Exhibit Hall A at the Sheraton-Washington Hotel. Prominent there will be the GPO Booth, numbers 106 & 108, which will be open January 5th, 4:00PM-7:00PM; January 6th, 11:00AM-5:00PM; January 7th, 11:00AM-5:00PM; and January 8th, 11:00AM-2:00PM. There will also be opportunities for librarians to visit the Library Programs Service January 3-4 and January 7-11. Arrangements for such visits should be scheduled ahead of time with the Administrative Librarian, Dan MacGilvray (703) 557-3892. Tours of the GPO printing facility are always available on request; and arrangements for them can be made with the Legislative Liaison/Public Affairs Officer, Sally Bloom (202) 275-3204.

\*\*\*\*\*

### CATALOGING TIMELINESS STUDY

Recently a study was conducted in the Classification and Cataloging Branch to investigate the timeliness of GPO cataloging for certain classes of documents. Since Congressional documents are given the highest priority in cataloging, monographs in SuDocs classes Y 1, Y 4, and Y 10 were selected for the study, which was conducted for a one-month period, from September 20, 1984, to October 19, 1984.

For each document, the number of days that elapsed from the date of receipt for classification to the date the cataloging record was produced in OCLC was recorded. It was found that within the group of 260 documents tracked during the month, the average amount of time that elapsed before the record was produced in the database was 24.4 days. 189 documents, or 72 per cent of the total, were input within fifteen days.

A recent processing improvement should result in a significantly shorter cataloging period for these documents. As of October 18, 1984, Cataloging Section 3, which prepares all Congressional monographic records, has become entirely automated, with all catalogers entering records into the OCLC database on-line. Prior to October 18, some work was prepared manually and subsequently input under contract. This time-consuming step has now been eliminated for Congressionals.

List of Superseded Depository Documents

LPS wants to thank those librarians attending the Depository Library Council Meeting in October, who volunteered to work on the update to the List of Superseded Depository Documents. The last edition of this important tool was issued in June 1981. Without the help of the librarians listed below, another update could not even be considered. If any other librarians, who served on the previous Superseded Documents Committee, would like to volunteer and lend their experience to the group, their support would be most appreciated again this year.

The classification numbers for Local Climatological Data: (State), Monthly and Annual Summaries (MF) have been changed. This was necessary in order to differentiate the LCD's (States), which will be sent to depository libraries in microfiche, from the LCD's (Individual Cities), which are available in paper format from the National Climatic Data Center, Asheville, N.C. 28801. The LCD's (States) contain the information that is found in the LCD's (Individual Cities). The item numbers for the new classification numbers will stay the same. This replaces the information that appeared in survey 84-4.

<u>Item Nos.</u>	<u>Title</u>	<u>Old Class</u>	<u>New Class</u>

## CONGRESSIONAL RECORD (BOUND)

Currently, the Congressional Record (bound) is offered in Paper (item no. 0993) and Microfiche (item no. 0993-A). The Congressional Record INDEX, which is usually printed at the end of each Congress, will now be offered separately under item nos. 0993-B (P) and 0993-C (MF). These will appear on Survey 84-09. If your library wants to continue receiving the Congressional Record index, you must select one of these new item numbers during Survey 84-09. If any changes need to be made to your selection for the Congressional Record (other than the Index), they can be made as usual during Selection Update Period 1985-#1.

\*\*\*\*\*

## MEDICARE PARTICIPATING PHYSICIAN/SUPPLIERS DIRECTORY

The Health Care Financing Administration has informed the Library Programs Service that the publication, Medicare Participating Physician/Suppliers Directory, announced in the Important News About Medicare brochure, is not a Government funded publication and, thus, does not meet the definition of a Government publication (44 U.S.C. § 1901). The publication will not be distributed to the depository libraries.

## FISH AND WILDLIFE SERVICE

### OFFICE OF INFORMATION TRANSFER

Drake Creekside Building Two

2629 Redwing Road

Fort Collins, Colorado 80526

AN-v5n14-11/  
84

6-13

30 October 1984

Dear Librarian:

We realize that changes in publication citations can disrupt cataloging and reference operations. We have found it necessary to revise the titles, content, and format of the U.S. Fish and Wildlife Service Research and Development publication series beginning early in 1985. We are providing the following information to help you respond to the changes.

The series Wildlife Leaflet will be renamed Fish and Wildlife Leaflet and will be reissued with No.1. The series content will be expanded to include fisheries in addition to wildlife topics. The page size for this series will change from 8 X 10½ inches to 7 7/8 X 10¼ inches.

The series Research Report and Research Report-Wildlife are being combined under the new series title Fish and Wildlife Research. The new series will contain both fisheries and wildlife topics. It will begin with issue No.1. Changes in this series' format include an increase in page size from 6 7/8 X 9 7/8 inches to 7 7/8 X 10¼ inches two 19 pica columns, and blue matte coated cover stock with black ink.

The series Technical Papers and Special Scientific Report-Wildlife will also be amalgamated under the new series title Fish and Wildlife Technical Reports. The series will begin with issue No.1, and the series will contain results from both fisheries and wildlife investigations. The only format change will be the use of mauve matte coated cover stock with black ink.

The FWS/OBS Series will be retitled Biological Reports, and will begin with issue No.1.

Fisheries and Wildlife Research, our unnumbered annual report has already been retitled Fisheries and Wildlife Research and Development. The annual reports will now incorporate summaries of progress by the Division of Biological Services and the Fish and Wildlife Cooperative Research units. Format changes will be limited to an increase in page size from 7½ X 9 7/8 inches to 7 7/8 X 10¼ inches.

The Resource Publication series will change only in cover layout.

The series North American Fauna, Fish Disease Leaflet, and Investigations in Fish Control will remain unchanged.

You may wish to initiate steps to adjust your cataloging and shelving procedures according to the above changes.

Sincerely yours,

Robert G. Streeter  
Chief

## DEPOSITORY LIBRARY COUNCIL INFORMATION

This issue of ADMINISTRATIVE NOTES is designed to share with readers some of the information made available at the October 10-12, 1984, meeting of the Depository Library Council to the Public Printer, which was held in Washington, D.C. Council Resolutions, passed at the Fall meeting, and Suggested Issues for consideration at Spring 1985 meeting, are included.

\*\*\*\*\*

## RESOLUTIONS

1. The Depository Library Council recommends that the Monthly Catalog index be produced in the form as presented in "Exhibit C" as both paper and microfiche products to be cumulated monthly. The register, "Exhibit A", containing the full record as it currently appears, should be produced as a microfiche product only. The implementation of these format changes should begin January 1, 1986.

Approved unanimously.

2. The Depository Library Council reiterates its interest in seeing the Public Printer implement a comprehensive, systematic, and formal program of quality control at the Library Programs Service.

Approved unanimously.

3. The Public Printer is requested to provide "rain checks" for all "shorts", regardless of quantity lacking, and for all claims properly submitted within 30 days. Libraries should be notified within 60 days of issuance of "rain checks" if a document cannot be received for distribution.

Approved unanimously.

4. The Depository Library Council requests that GPO issue an opinion by the Spring 1985 Depository Library Council meeting, on the replacement of depository government publications with privately-produced microformats of the same publications as described in Section 13 of the revised Instructions to Depository Libraries June 1984.

Approved unanimously.

5. Whereas confusion was caused by GPO's statement in Administrative Notes, v. 5, no. 11, p. 6, regarding reprints, therefore,

Be it resolved that the Depository Library Council requests that GPO confirm the depositories long-held presumption that reprints fall under Section 11, Instructions to Depository Libraries, revised June 1984. This states that publications which are superseded, revised, bound, cumulated, or replaced by other publications which are stated to contain similar information may be discarded.

In favor, 13. Opposed, 0. Abstaining, 1. Approved.

6. Whereas the Depository Library Council finds unacceptable the linkage between correcting GPO's Monthly Catalog magnetic tapes and the printing of consequent corrected entries in the paper version of the Monthly Catalog, therefore,

Be it resolved that retrospective correction of entries on GPO tapes not be reflected in future Monthly Catalogs other than in the traditional manner via the Monthly Catalog's "List of Corrections".

Approved unanimously.

7. The Depository Library Council is greatly disappointed at the failure of GPO to successfully obtain funding to proceed on the Federal Documents Data Base. Council reiterates its continued interest in and support for the FDDB. We strongly recommend that a recognized library systems consultant be contracted to help GPO determine which facts and figures need to be collected to successfully obtain funding to implement the FDDB or a comparable alternative.

Approved unanimously.

8. The Depository Library Council recommends that the GPO discontinue the inclusion in the Serials Supplement of basic manuals and serials that are sold on subscription by the Superintendent of Documents, only if Library Programs Service has provided the cataloging record in the Monthly Catalog.

Approved unanimously.

9. The Depository Library Council recommends that GPO include transmittals, updates, etc., to basic manuals in the "List of Special Materials" which appear in the preliminary pages of every Monthly Catalog. These should not be cataloged in the Serials Supplement.

Approved unanimously.

10. The Depository Library Council recommends that GPO resume cataloging monographic series, e.g., U.S.G.S. Professional Papers, as serials records, in addition to the individual analytics for each monographic series. Both of these records shall appear in the Monthly Catalog printed and tape products.

Approved unanimously.

11. The Public Printer is to be commended for supporting the Depository Library Council's recommendations to establish a task force to advise GPO on conducting a needs assessment related to government publications education.

We recommend that this task force also be charged with developing a formal plan for the design and implementation of educational activities needed to improve the management of depository libraries and the use of government information.

Council accepts the Public Printer's invitation to suggest a panel of experts who might serve on this task force. Two Council members, Bruce Morton and Patricia Reeling, have volunteered to work with this task force. Council recommends that Patricia Reeling serve as chair of this task force.

Approved unanimously.

12. Whereas there is a dearth of reliable statistical information about the depository system;

Be it therefore resolved that the Government Printing Office identify a basic core of statistics on the collections and operations of depository libraries to be reported by the libraries annually, and

Be it further resolved that the Government Printing Office develop a similar reporting system for the Library Programs Service, and

Be it further resolved that the Government Printing Office report to the Depository Library Council at its Spring 1985 meeting on the data elements identified and plans for collecting the data, and

Be it further resolved that the Government Printing Office permanently retain in machine-readable form the statistical data collected about the depository library system.

Approved unanimously.

13. The Depository Library Council recommends the adoption of a sequential shipping list numbering system compatible with GPO computer applications. It is further recommended that GPO survey the depositories prior to implementation regarding their approval of the new shipping list numbering system.

In favor, 13. Opposed, 1. Abstaining, 0. Approved.

14. The Depository Library Council recommends that the Public Printer seek the advice of authorities from the Library of Congress, the National Archives and Records Service, and other appropriate advisors, to develop a list of rare documents.

In favor, 13. Opposed, 1. Abstaining, 0. Approved.

15. The Depository Library Council recommends that the List of Superseded Classes be updated by GPO as a supplement to the List of Classes and a supersession schedule be established for each class when listed.

In favor, 8. Opposed, 0. Abstaining, 6. Approved.

16. The Depository Library Council has reviewed the item card options offered by the Government Printing Office and recommends the adoption of "Option 1C", the present format, as appended. Moreover, every effort should be made to provide specific information about the publications to be distributed under each item number, since these records are collection development tools for the depositories.

In favor, 13. Opposed, 0. Abstaining 1, Approved.

17. Whereas the Government Printing Office has issued a legal opinion that depository libraries are held liable for damages to or loss of their depository collections, the Depository Library Council requests that by January 1, 1985, the Government Printing Office notify the directors of all depository libraries of this opinion and provide them with the necessary formulas for evaluating their collections.

In favor, 13. Opposed, 1. Abstaining, 0. Approved

18. The Depository Library Council recommends that the Government Printing Office base its cataloging of serials on the definition of serials as defined in the AACR II. In addition, the established SUDOC stem should be used in the Monthly Catalog entries, not the dummy number as used in the 1984 Serials Supplement.

In favor, 4. Opposed, 5. Abstaining, 5. Resolution failed.

SUGGESTED ISSUES FOR CONSIDERATION AT SPRING 1985 MEETING,  
DEPOSITORY LIBRARY COUNCIL TO THE PUBLIC PRINTER

1. Examine proposals and define the content of the Serials Supplement.
2. Invite a member of the GODORT Cataloging Committee to address unresolved issues.
3. Consider bibliographic control issues.
4. Discuss delivery of government information in electronic format.
5. Receive a report on progress of the DLC Education Task Force.
6. Discuss developing and/or expanding networking between and among states on both formal and informal bases.
7. Concerning regionals, address:
  - a) the dilemma of space problems not solved by microformat,
  - b) potential federal funding, and
  - c) the creation of an association of regional librarians.
8. Provide a printed update on state plans.
9. Discuss the potential development of a congress of depository librarians.
